

## Siren With Strobe

### Purpose:

The siren with strobe apparatus is one kind terminal devices for alarm which is fit for the sound & light alarm when fire/alarm happens.

### Feature:

Two wires connection style(sound and light use same wires); high bright white LED gives strobe, three kinds of sound are optional; available to DC 12 or 24 V power.

### Technical Parameter:

NO.	Project name	Index parameter	Unit	Remarks
1	Temp Range	-10~+50	°C	
2	Humidity Range	≤95%	RH	
3	Operating Voltage	DC12- 24	V	
4	Working Current	40-110	mA	
5	Flash Intensity	≥1.2	WS	
6	Flash Period	≤1.0	S	
7	Audio Alarm	≥100	dB	
8	Life of flash light	≥40000	times	
9	Sources of sound alarm	Three kinds	I Ambulance sound II Sound of police car II Sound of fire truck	
10	Dimensions	134*114*43	MM	

### Installation:

1, At first , make two holes well in the wall where needs installation , the holes distance is 80 MM, insert plastics expand stopper , (if the wall is the wooden material , can be firmed by self-tapping screw.).

2, Connect DC 12 or 24V power to the power terminal, and set up a kind of alarm sound accordingly;

3, Fix the alarm with two self-tapping screws and tighten the screw.
